

# Cambodia

GSK is a global biopharma company with the ambition and purpose to unite science, technology and talent to get ahead of disease together.

We aim to positively impact the health of 2.5 billion people over the next 10 years. Our bold ambitions for patients are reflected in new commitments to growth and a step-change in performance.

We prioritise innovation in vaccines and specialty medicines, maximising the increasing opportunities to prevent and treat disease. At the heart of this is our R&D focus on the science of the immune system, human genetics and advanced technologies, and our world-leading capabilities in vaccines and medicines development. We will focus on four therapeutic areas: infectious diseases, HIV, oncology, and immunology.
